There are **4** files which we need to run using **vdbench**. After creating ZFS and ext4 partitions, place **zfs_compression**, **ext4_compression**, **zfs_largefiles** and **ext4_largefiles** in the **vdbench** folder. Run the following commands one by one:

```
sudo ./vdbench -f zfs_compression
sudo ./vdbench -f ext4_compression
sudo ./vdbench -f zfs_largefiles
sudo ./vdbench -f ext4_largefiles
```
